# A NEW POINT OF VIEW

Operator efficiency begins with operator comfort, and your operators get comfort without compromise in the new deluxe Super Boom® cab. The deluxe cab on skid steer models L150 through L190 and on all compact track loaders breaks new ground when it comes to dimensions, visibility and ease of operation. It literally expands your view of the world, while expanding your worksite efficiency.

## Deluxe cab enclosure

- A huge glass door opens a full 90 degrees for easy entry and exit and, when closed, provides superior visibility to all corners and creates an open, uncluttered sense of space
- Heater/defroster kit and optional air conditioning allows you to control the climate in any weather
- Quieter interior sound level due to full-covering and noise-absorbing trim
- Optional sound suppression package reduces noise level by up to two decibels for an even quieter operator environment
- The deluxe cab enclosure includes a repositioned windshield wiper for a clearer view in all conditions

## Spacious comfort

- More headroom and elbow support for greater operator comfort
- A comfortable, contoured suspension seat is standard equipment
- The smoothest ride on the market results from the wide stance of Super Boom compact track loaders and the longer wheelbase of Super Boom skid steers

The see-through area on the cab roof provides a clear view to the bucket or attachment, even when it's positioned at full height.

Full-view front windshield provides an outstanding view.

Standard contoured armrests provide resting room for your forearms during long hours on the jobsite.

Open ROPS models also feature enhanced downward sightlines as well as a clearer view to a fully raised bucket.

High-visibility backlit controls at-a-glance instrument panel with logical labeling for easy operation.

#### **Deluxe interior and expansive visibility**

- The new, fully detailed cab interior provides a quieter more comfortable place to work
- On enclosed cabs, the curved door features more glass for an outstanding view
- Slimmer front lights at the side of the cab or ROPS expands your view to the front especially to the upper corners, making it easier to position loads overhead and maneuver in low-clearance areas
- Enhanced downward sight lines provide a better view to the loader bucket, into the trench, and to the tracks on compact track loaders
- Rear visibility continues to be one of the best in the industry due to the large rear window, low engine hood and no rear frame towers to block your view

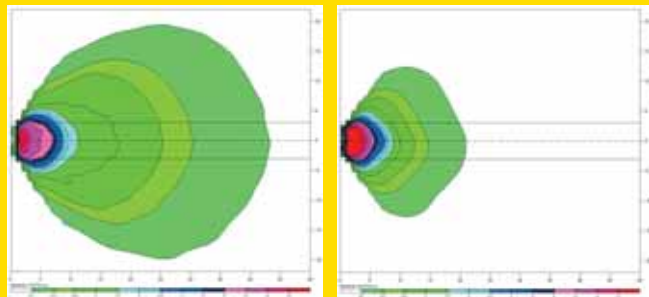

# BEST-IN-CLASS FEATURES

## LIGHTING PACKAGE

The new Super Boom deluxe cab extends your visibility in dusk and dark conditions with a lighting package that's superior to the competition. Just compare the extended area of illumination provided by the new Super Boom cab. It gives you a competitive advantage that allows you to work with confidence, and at maximum productivity in fog, dust or at any hour. To the front, new lights are positioned to extend the illumination area to either side. To the rear, additional halogen lighting increases the illumination area dramatically.
